getText

public getText(selector: String)

API to extract text by designating the DOM selector.

- Extractable DOM: <div>, <td>, <p>, <span>

Params: selector

Name	Type	Description
selector	string	Selector to get DOM to edit

Return: text

Name	Type	Description
test	string	Text extracted from DOM

Example:

```
let field = window.editor.getText('#field');
let name = window.editor.getText('#name');
let birth = window.editor.getText('#birth');
let address = window.editor.getText('#address');
let phone = window.editor.getText('#phone');
let copyright = window.editor.getText('#copyright');
```

Experiencing

The feature to directly access document model (DOM) of the Editor and manage the information is provided.
