

Setting Importable/Uploadable Extensions

'editor.import.extensions' key for setting importable file extensions is available in **RELEASE 2.8.0 OR ABOVE**.

You may set the uploadable filename extensions using 'editor.upload.image.extensions', 'editor.upload.video.extensions' and 'editor.upload.file.extensions' keys.

synapeditor.config.js

```
{
  'editor.import.extensions' : ['doc', 'docx', 'hwp', 'hml', 'htm', 'html', 'txt', 'xls', 'xlsx'],
  'editor.upload.image.extensions': ['jpg', 'gif', 'png', 'jpeg'],
  'editor.upload.video.extensions': ['mp4', 'ogg', 'webm'],
  'editor.upload.file.extensions': ['bmp', 'css', 'csv', 'diff', 'doc',
                                     'docx', 'eof', 'gif', 'jpeg', 'jpg',
                                     'json', 'mp3', 'mp4', 'm4a', 'odp',
                                     'ods', 'odt', 'ogg', 'otf', 'patch',
                                     'pdf', 'png', 'ppt', 'pptx', 'rtf',
                                     'svg', 'swf', 'textile', 'tif',
                                     'tiff',
                                     'ttf', 'txt', 'wav', 'webm', 'woff',
                                     'xls', 'xlsx', 'xml', 'md', 'vtt',
                                     'hwp', 'hml', 'html']
}
```
