Using base64 Images

With 'editor.upload.image.base64' setting, you may determine if you will use base64 image when you upload images (default - false).

If set to true, when an image is inserted, the image will not be uploaded to the server but, instead, will be encoded into base64 image and displayed in the body.

synapeditor.config.js

```
{
        'editor.upload.image.base64': false,
}
```

Example Result of Image Insertion

```
<div class="se-contents" style="font-family: Arial, Helvetica, sans-serif; font-size: 11pt; line-height:
1.2; padding: 25px;">
        <p style="overflow-wrap: break-word; margin: 16px 0px; display: block;">
                <span></span>
                <span class="se-drawing-object-wrapper se-image" style="vertical-align: baseline; text-
indent: 0px; display: inline-block;">
                        <img src="
