

# Loading the Edited HTML

You may load the contents edited in Synap Editor through Javascript function as follows.

## Javascript

```
<script>
var html = editor.getPublishingHtml();
</script>
```

Check if `editor.getPublishingHtml()` function is working by opening the browser's console window (F12).

You may check if *editor.getPublishingHtml()* function is working by opening the browser's console window (F12).
