

Plugin

RELEASE 2.4.0 OR ABOVE

You may apply plugins provided by SynapEditor to use extended features.

How to Use Plugins

Loading Plugins

```
<!-- Note) Plugin files shall be created under SynapEditor file.-->

<!-- SynapEditor File-->
<link rel="stylesheet" href="../../synapeditor.min.css">
<script src="../../synapeditor.min.js"></script>

<!-- Plugin File-->
<link rel="stylesheet" href="../../plugins/webAccessibilityChecker/webAccessibilityChecker.min.css">
<script src="../../plugins/webAccessibilityChecker/webAccessibilityChecker.min.js"></script>
```

Generating Plugin UI

```
<script>
    new SynapEditor('ID of HTML element to initialize the Editor', {
        //...
        'editor.toolbar': [
            //...
            'webAccessibilityChecker' //If you wish to expose the buttons provided by a plugin, use
the name provided by the plugin for the name of UI, just as the existing Editor configurations.
            //...
        ]
        //...
    });
</script>
```
