 3. [Spell Check](#)
 4. [Inline Editor](#)
 5. [Replace All](#)
-

1. Plugin Configuration Feature Has Been Added

- Plugin configuration feature has been added in Synap Editor 2.4.0. In addition, some features including special character and personal information protection have been separated as plugins. Please refer to [Plugin Guide](#) for details

2. Improved Excel Function UX

- Formula editing UI and UX used in the tables have been improved.
 - Input box to enter formula has been removed from the cell balloon popup.
 - In the formula inserting method at cell balloon popup, formula coordinate will be shown if you enter '=' into a cell and the entered formula will be automatically calculated when you press Enter or move the caret after writing the formula.
 - Expression of cells with formula has been changed.
- Experiencing: [Automatic formula calculation](#)

3. Spell Check

- Spell Check plugin has been added.
- Plugin: [Spell Check](#)

4. Inline Editor

- Inline editor mode is now supported.
- Experiencing: [Inline editor](#)

5. Replace All

- Replace All feature has been added to Find and Replace.
- Experiencing : [Find and Replace](#)
