

Using Color Icon

RELEASE 2.6.0 OR ABOVE

This is 'Color Icon' plugin for the basic theme that changes the editor's icon to a color icon.

How to use

Include color icon files in the html page where the editor is applied.

```
<!-- SynapEditor object must exist to apply it, so it must be included under editor script file. -->
<script src="../../dist/plugins/icons/basicColorIcons.js"></script>
```
