

getPublishingHtml

Export the contents edited in Synap Editor in the HTML form.

Parameters:

Name	Type	Attribute	Description
bWrap	boolean	default : false	Determine if the edited contents shall be wrapped with <html> tag.
emojiEscapes	boolean	default : false	Determine if emoji characters shall be converted in HTML Entity form.
contentPadding	object	default : 'none'	Determine the value for document margins. 'document': Use the margins of the imported document. 'none': Do not use the margins.

Return:

Type	Description
String	HTML contents edited in Synap Editor

Example:

```
var html = editor.getPublishingHtml();
```

Export HTML while including the margins of the current Editor

```
var html = editor.getPublishingHtml({'contentPadding': 'current'});
```
