

Theme Configuration

RELEASE 2.6.0 OR ABOVE

Applying the theme

1. Include the theme CSS file in the html page where the editor is applied.

index.html

```
<!-- Theme CSS -->
<link rel='stylesheet' href='../dist/themes/dark-gray.css'>
```

2. Set the theme in the editor setting 'editor.ui.theme'.

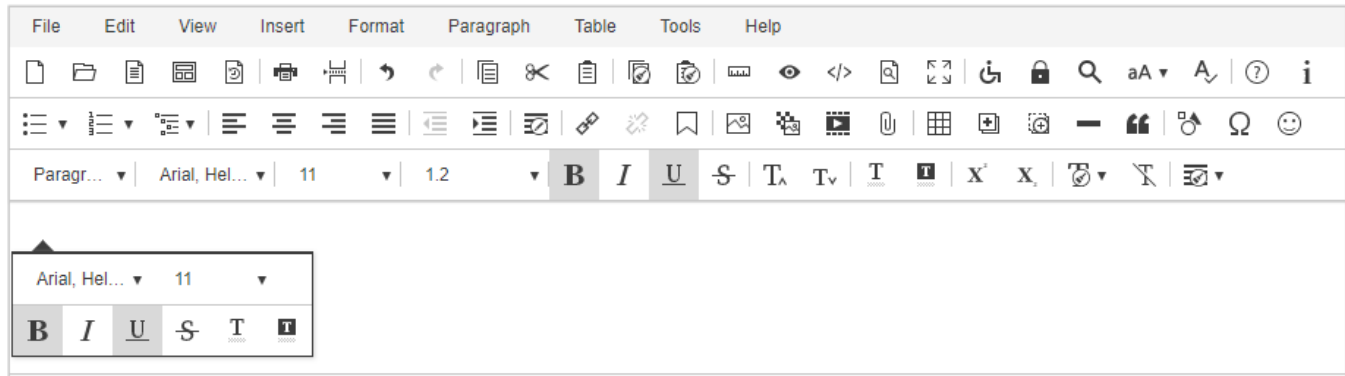

config.js

```
var synapEditorConfig = {
  "editor.ui.theme": "dark-gray" // Theme name
};
```

3. The theme is applied.

Theme list

default

dark-gray
