uploadBase64Images

Upload all images included in the body as base64 encoded. The uploaded image's src attribute is changed to the uploadPath value returned from the server.

Parameters:

Name	Type	Attribute	Description
callbackFunc	Function		Set the callback function to be executed after uploading all images. (optional)

Example:

Using Promise

```
editor.uploadBase64Images().then(function() {
    editor.getPublishingHtml();
});
```

Using Callback Function

```
function callback() {
    editor.getPublishingHtml();
}
editor.uploadBase64Images(callback);
```
