isEdited

RELEASE 2.8.0 OR ABOVE

'It determines whether there is any edited content in Synap Editor.

Return:

Туре	Description
Boolean	true false (Returns true if there is edited content.)

Note: The isEdited() function uses the undo stack to quickly check whether there is edited content. Even if there is no actual change (if you enter "A" and delete it with the backspace key), it can be judged there was editing.

Example:
