

setMode

It changes between the editor modes (Edit / Preview / View Source Code).

Parameters:

Name	Type	Description
mode	string	- Edit Mode : 'edit' - Source Code View Mode : 'code' - Preview Mode : 'preview'
[callback]	function	RELEASE 2.12.0 OR ABOVE Callback function to be executed after editor mode change is completed

Example:

```
// Toggle between preview / edit modes
if (editor.isPreviewMode()) {
    editor.setMode('edit');
} else {
    editor.setMode('preview');
}
```

```
// Using callback functions (Release 2.12.0 or above)
var callback = function () {
    console.log('done');
}
editor.setMode('edit', callback);
```
