setUnlock

public setUnlock(selector: String)

'It specifies the DOM selector to allow editing.
It is useful when limiting editing of the entire document and allowing only partial editing.
When applied, it is displayed as an unlock icon ( ).

Allowed to edit

- DIV
    - Elements with "se-contents" and "se-div" classes specified
- TABLE
- TD
- TH

Params: selector

Name	Type	Description
selector	string	Selectors to import the DOM to limit editing

Example:

```
window.editor.setUnlock('#unlock_element_Id');
window.editor.setUnlock('.editable');
```

Source View

You can add 'se-unlock' class to the applied element in the Source View Mode of the editor.

Experiencing

You can allow or restrict editing to specific parts of the editor.
