

command - addRunStyle

Apply the text style to the selected text.

Merge the style received as an object to the existing style.

Parameters:

Name	Type	Description
actionName	String	'addRunStyle' text style adding API
style	Object	Style object to apply

Example:

```
editor.execCommand('addRunStyle', { fontSize: {value: 20, unit: 'pt'} }); // Add font size
editor.execCommand('addRunStyle', { color: {r: 255, g: 0, b: 0} }); // Add font color
editor.execCommand('addRunStyle', { backgroundColor: {r: 0, g: 0, b: 255} }); // Add font background color
```
