

command - setTextVertAlign

Make the selected text superscript or subscript.

In caret status, the text to be entered becomes superscript or subscript.

Parameters:

Name	Type	Description
actionName	String	'setTextVertAlign' superscript and subscript API
value	String	Superscript and subscript properties: 'superscript', 'subscript'

Example:

```
editor.execCommand('setTextVertAlign', 'superscript');  
editor.execCommand('setTextVertAlign', 'subscript');
```
