

command - moveDrawingObject

Move the selected image or video.

Parameters:

Name	Type	Description
actionName	String	'moveDrawingObject' image or video moving API
x	Number	x coordinate to move to
y	Number	y coordinate to move to
isFinish	Boolean	Whether moving is finished (it is recommended to apply isFinish true when execCommand is moved)

Example:

```
editor.execCommand('moveDrawingObject', 100, 100, true);
```
