

command - toggleDrawMode

2.8.0

Toggles the drawing mode.

Parameters:

Name	Type	Description
actionName	String	'toggleDrawMode' drawing mode toggling API.
uiName	String	The name of the UI that executed the drawing function.
callback	Function	Callback function to be executed after drawing is completed.

Example:

```
editor.execCommand('toggleDrawMode', 'customUIName', function (rect) {  
    var x = rect.x;  
    var y = rect.y;  
    var width = rect.width;  
    var height = rect.height;  
  
    console.log(x, y, width, height);  
});
```
