

command - blockUI

Block all features of UI component

You may set exceptions in certain feature names with `exceptUINames` parameter.

Related command : [unblockUI](#)

Parameters:

Name	Type	Description
actionName	String	'blockUI' UI component blocking API
[exceptUINames]	Array	Names to be exempted from the blocking

Example:

```
editor.execCommand('blockUI');  
editor.execCommand('blockUI', ['bold', 'italic']); // Disable all functions except 'bold' and 'italic'
```
