

command - zoomDrawingObject

Zoom in or out the selected image or video.

Parameters:

Name	Type	Description
actionName	String	'zoomDrawingObject' image or video zooming in or out API
isWidth	Boolean	Whether the width either increases or decreases
isHeight	Boolean	Whether the height either increases or decreases
zoom	Number	Size to which the image or video is resized(px)

Example:

```
editor.execCommand('zoomDrawingObject', true, false, 10); // increase width by 10px
editor.execCommand('zoomDrawingObject', false, true, 10); // increase height by 10px
editor.execCommand('zoomDrawingObject', true, true, -10); // decrease width and height by 10px
```
