

# command - insertTable

Insert table at the caret position.

When the caret is positioned within a paragraph, the paragraph is divided and the table is inserted.

When there is a selection, the selected block is deleted and the table is inserted.

## Parameters:

| Name       | Type   | Description                                            |
|------------|--------|--------------------------------------------------------|
| actionName | String | 'insertTable' table inserting API                      |
| rowcol     | Object | { row: {Number} col: {Number} }<br>row/column of table |

## Example:

```
editor.execCommand('insertTable', { row: 2, col: 2 }); // insert 2x2 table
```
