, ''.

안녕하세요.
금칙어는 바보입니다. I

```
<!-- SynapEditor          include    -->  
  
<script src="forbiddenWordDetection.min.js url"></script>  
<link rel="stylesheet" href="forbiddenWordDetection.min.css url">
```

```
//...  
'forbiddenWordDetection.config': {  
  'words': ['', ''], //  
  'replaceText': '' // . (: '*' ) . ex) '!@' : '' -> '!!!'  
},  
// ...
```

UI

'forbiddenWordDetection' , .

```
//...
'editor.toolbar': [
    //...,
    'forbiddenWordDetection',
    //...
],
// ...
```

```
//...
'editor.menu.definition': {
    //...,
    'tools': [
        //...,
        'forbiddenWordDetection',
        //...
    ],
    //...
},
//...
```

API

editor.checkForbiddenWord(callback)

callback .

Parameters:

name	Type	Description
callback	Function	. . <pre>function (result: boolean, word: string) { // result() : true , false // word() }</pre>

Example

```
editor.checkForbiddenWord(function (result, word) {
    if (!result) {
        window.alert(word + '() .');
    }
});
```

```
editor.checkForbiddenWord(function (result) {  
  if (!result) {  
    editor.getUIManager().showDialog('forbiddenWordDetection');  
  }  
});
```
