API

SynapEditor.addPlugin(pluginName, pluginGenerator)

.

Params:

Name	Type	Description
pluginName	string	.
pluginGenerator	function	.

Example:

```
var pluginName = "pluginName";
var pluginGenerator = function (editor) {
        //  .
        return {
                //...
        };
};
SynapEditor.addPlugin(pluginName, pluginGenerator); //  ,     .

...
new SynapEditor(editorId, synapEditorconfig, ...); //
```

<table>
<tr>
<td>buttonDef</td>
