```

1.

API .

```
var editorId = 'synapEditor';
var editorConfig = {};
var html = '';
var editor = new SynapEditor(editorId, editorConfig, html);

editor.setEventListener('afterUploadImage', function (e) {
        var fileType = e.fileType;
        var uploadPath = e.path;
        e.editor.addUploadPath(fileType, uploadPath); // editor.getUploadedFiles()
});

editor.setEventListener('beforeUploadImage', function (e) {
        var fileType = e.fileType;
        var uploadCount = e.uploadCount; //     (   )
        var imageCount = 0;
        e.editor.getUploadedFiles(fileType).forEach(function (info) {
                if (!info.isDeleted) {
                        imageCount++; //
                }
        });
        if (imageCount + uploadCount >= 5) { // 5
                e.returnValue = false; // returnValue false
                alert(' 5  ');
        }
});
```

API

- getUploadedFiles
- addUploadPath
